The People's Accord for the Conservation of Life on Earth

Life on this Planet Faces Extinction if we don't act NOW.

This Accord represents the Will of all People on Earth to require that immediate actions be taken to conserve life and ensure a healthy future for humanity.

Humanity faces a critical threat of extinction due to the alarming decline in the state of health of our four essential elements that we all need to survive, namely, the air we need to breathe, the water we need to drink, the earth upon which we grow our food, and sunlight vital to life.

Therefore, we, the undersigned, call for immediate action from our Nation's Leaders to cease deliberate actions that unnecessarily damage and risk destruction of these elements and sign a Global Treaty as written.

Official Accord for the Immediate Signing of a Global Treaty

We, the people of the world:

- Recognizing the need for an immediate, effective and progressive response to the global threat of destruction of life on this planet in accordance with current best available scientific knowledge;

- Recalling the purpose and principle of each human being's moral and ethical code that all Nations Leaders are obligated to uphold; and

- Declaring that the collective will of the people of this world is now being expressed.

Hereby issue this People's Accord for the Conservation of Life, calling upon all Nations to act by signing a Global Treaty that has been created for the purpose of ensuring a healthy future for now and generations to follow.

SECTION I — DECLARATION OF THE PEOPLE'S WILL

1. We declare that:

    - On-going wars, indiscriminate development of nuclear energy and weapons, and misuse of natural resources cause unnecessary damage to the elements of life, threatening the ecological systems upon which all life depends. These actions also risk destruction of the essential elements, which threatens the future for humanity;

- The inherent dignity, equality, and right to life for all human beings is not something that any human should have to battle for. The continuation of war is not compatible with the survival, advancement, or moral evolution of humanity. War is not a means of resolving disputes, especially when it risks causing the extinction of all life on the earth;

- The quality of the essential elements of life, together, are at emergency levels struggling to function as nature intended for all humans share one airshed, one watershed, and one planet;

- These essential elements are at such grave risk of being pushed beyond their tipping points, as assigned by nature, that new rules for living life must immediately be implemented into policy and law by all Nations to prevent the extinction of mankind and life on this planet as we know it. These rules are aligned with the Natural Laws of our planet, and are available for all Nations to adopt into their own domestic policies, and implemented in local laws; and

- The urgency of this matter is supported by the research and knowledge of qualified environmental and research scientists from around the world.

2. We affirm that:

- The root cause of the current instability across the planet is because humanity is not living in alignment with the Natural Laws of our planet. Aligning human actions with the Natural Laws will begin the process of correcting the pain and suffering that humans have been experiencing and start humanity on a path to health, peace, and prosperity;

- Dr. Robert J. Watters (Environmental Scientist), acting through WaterStarr Global Initiatives, has presented a solution to the immediate crises and threats to the essential elements. This solution involves aligning human activity to the Natural Laws of the planet. This solution will be made available to all Nations in a Global Unification and Conservation Initiative, which will outline how to implement the Natural Laws of Life into the day-to-day lives of humans. These Natural Laws must become the universal standards around the world;

- The protection of humanity and the planet must take precedence over political and military interests at all costs and at all times; and

- The value and continuance of all life is sacred and to be cherished. All life is a gift that must be conserved and preserved at all costs.

SECTION II — CALL TO ACTION FOR NATION'S LEADERS

We, the undersigned, collectively call upon all Nation's Leaders to:

- Publicly acknowledge this Accord;
- Adopt, sign, and ratify the Global Treaty that establishes agreement to protect the essential elements of life at all costs;
- Act in a timely manner due to the urgency of the risks posed by continued armed conflict and activities that are weakening the essential elements of life on the planet and increasing the potential for extinction of all life; and
- Cooperate with other Nations to ensure a coordinated global transition to this new path towards conservation of the essential elements and peace and prosperity for all.

SECTION III — ROLE OF THE GLOBAL SOCIETY

We call upon:

- All citizens of the world to unite, agree with, and sign this People's Accord for the Conservation of Life.

SECTION IV — LEGAL STATUS

1. This Accord:
   - Is a non-binding instrument under international law.
   - Does not create legal obligations for Nations.
2. However, it constitutes:
   - A formal expression of global public will.
   - A legitimate basis for political, diplomatic, and institutional action.

SECTION V — FINAL DECLARATION

We, the people of the world, united across Nations, cultures, and generations, hereby declare that the time has come for humanity to take action to ensure the conservation of life by living in harmony with the Natural Laws of our planet.

We call upon all Nation Leaders to comply with this Accord, sign the Global Treaty, and implement the new rules for humanity set out in the Global Unification and Conservation Initiative.

The solutions found in the Global Unification and Conservation Initiative curate the population of this planet towards a life that is lived according to Natural Laws and ensure that the Will of the People is upheld.

The goal set out by the People of the World to create a healthy future must manifest as created. The People have spoken.

SECTION VI — GLOBAL SIGNATORY REGISTRY

This Accord shall be accompanied by a Global Signatory Registry, documenting the collective Will of the People.

Each individual signatory affirms that:

- Dr. Robert John Watters, acting through WaterStarr Global Initiatives, is assigned as my representative acting on my behalf for the execution of this Accord and liaison with Nation Leaders to ensure they take immediate actions to conserve life on earth and ensure a healthy, peaceful future for all.
